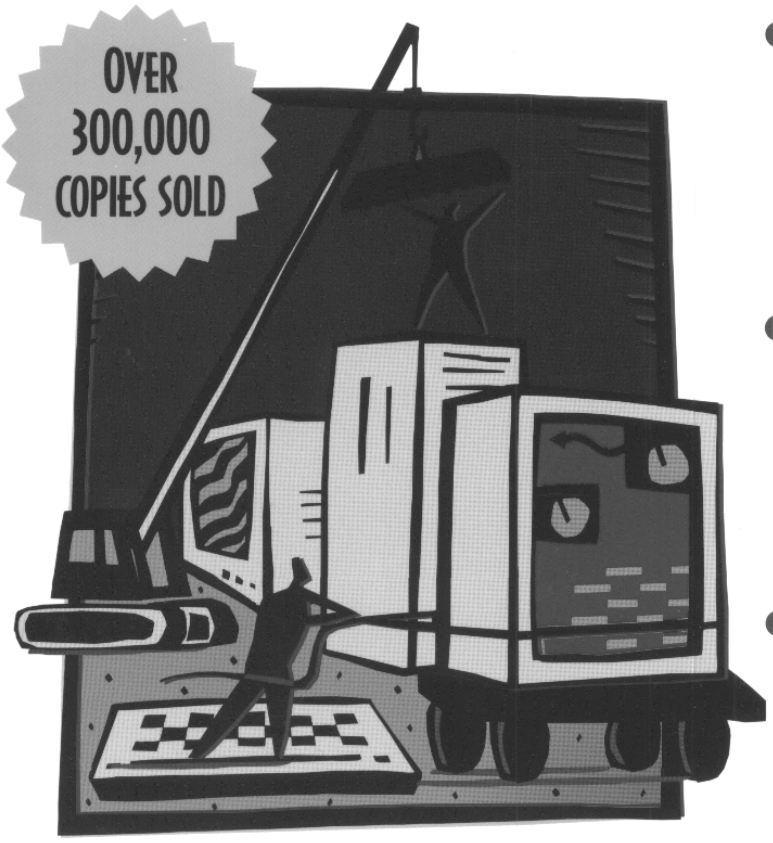
BUILD YOUR OWN PENTIUM II™ PC



- NEW! INCLUDES THE AMD K6, CYRIX 6X86MX, AND IDT C6 CPUS!
- STEP-BY-STEP INSTRUCTIONS—FROM SELECTING COMPONENTS TO INSTALLING SOFTWARE
- PACKED WITH TROUBLESHOOTING TIPS AND TRICKS

AUBREY PILGRIM

CONTENTS

	Introduction	XIII
Chapter 1	What's Inside	1
	Tools Needed	2
	Major Computer Components	3
	Minimum System Requirements	4
	How Computers Work	18
	Moore's Law	26
Chapter 2	The Motherboard	27
	Motherboard Sources	28
	Motherboard Specifications	34
	The ATX Motherboard and Power Supply	40
	Motherboard Variations	42
	Jumpers	44
	DRAM Bus Frequency	44
	ROM BIOS	45
	Some Basic Stuff about Motherboards	47
	Architecture	56
	Deciding What to Buy	61
	Replacing a Motherboard	61
Chapter 3	The CPU	63
	PR Hype	64
	How a CPU is Made	77
	What's in a Number?	77
	Basic Characteristics of CPUs	78
	CPU Sockets	83
	Resources	87
Chapter 4	Memory	91
	Memory Slots	92
	Types of Memory Modules	94

	How Much Memory Do You Need?	96
	Basics	96
	A Brief Explanation of Memory	99
	Things to Consider Before You Buy Memory	105
	SRAM	107
	Cache Memory	108
	CMOS	109
	Why the 640-Kb Limit?	110
	Conventional Memory	111
	Extended Memory	111
	Buying Chips	112
	Installing the Chips	112
Chapter 5	Floppy Drives and Disks	115
	1.44-Mb Floppy	116
	2.88-Mb Floppy Drive	117
	The lomega 100-Mb Zip Drive	118
	The LS120	118
	The 200-Mb Floppy Drive	122
	How Floppy Drives Operate	125
	Differences among Floppy Disks	131
	Disk Format Structure	134
	Formatting	138
	Cost of Disks	140
Chapter 6	Choosing a Hard Disk	141
	What Should You Buy?	142
	Removable Disk Drives	145
	Data Compression	151
	Floppy and Hard-Drive Similarities	152
	How They Can Make Smaller Drives	160
	Cables and Connectors	162
	Installation and Configuration	162
	Sources	170
Chapter 7	Backup and Disaster Prevention	171
	Write-Protect Your Software	172
	BAK Files	173
	Unerase Software	173
	Delete Protection	174

	Jumbled FAT	174
	Reason for Smaller Logical Hard Disks	175
	Partition Magic and Partition-it	175
	Head Crash	176
	Preventing Hard Disk Failures	180
	A Few Reasons Why People Don't Back Up and Why. They Should	181
	Theft and Burglary	182
	Archival	182
	Data Transfer	182
	Types of Backup	183
	Uninterruptible Power Supplies	188
Chapter 8	CD-ROM	191
	CD-ROM Drives	192
	CD-ROM Titles	194
	How CD-ROM Works	197
	CD-ROM Differences	202
	CD-ROM Recorders (CD-R)	206
	Kodak Photo CD	211
	Digital Videodisc (DVD)	212
	Installing CD-ROM Drives	213
Chapter 9	Monitors and Adapters	217
	Flat-Panel LCD Monitors	219
	USB Monitors	220
	AGP Adapters	221
	3D Adapters	221
	Video Memory	223
	Adapter Memory Chips	223
	MPEG Boards	225
	Using a TV as a Monitor	226
	Monitor Basics	227
	Adapter Basics	232
	Choosing a Monitor	235
	Installation	241
	Glossary of Monitor Terms from Princeton Graphics	242
	Other Resources	246
Chapter 10	Input Devices	247

	Keyboards	248
	Mouse Systems	255
	Touch Screens and Light Pens	258
	Joysticks	259
	Digitizers and Graphics Tablets	259
	Pressure-Sensitive Graphics Tablets	259
	Scanners	260
	Voice Recognition Input	267
	Computers and Devices for the Handicapped	270
Chapter 11	Communications	275
	Telephones	276
	Modems	277
	Installing a Modem	282
	Bulletin Boards	287
	Viruses	288
	Virus Hoaxes	289
	Online Services	289
	Banking by Modem	290
	Facsimile Machines	290
	Telephone Outlets for Extensions	294
	Combination Devices and Voice Mail	295
	Telecommuting	296
	Remote-Control Software	297
	Telephony	298
	National Telephone Directories	300
	ISDN	301
	Cable Modems	301
	Sources	302
Chapter 12	Upgrading an Older PC	303
	Why You Should Do It Yourself	304
	What If It Is Too Old to Upgrade	304
	Upgrading to a New Hard Disk	305
	Buying a Used Computer	308
	Buying a Barebones System	309
	Upgrading to a New Computer	310
	Minor Upgrades	311
	Memory Upgrade	312
	Upgrading the CPU	313

	Replacing the Motherboard	314
	Pentium II Motherboard with a 300-MHz MMX CPU	315
	Back to Reality	317
	Steps to Replace a Motherboard	318
	There Is No End to Upgrade Possibilities	324
Chapter 13	Assembling Your Computer	327
	Needed Components and Tools	328
	Static Electricity Warning	328
	Assembly Steps	329
	Software Installation and Formatting	346
	Install in the Case	353
	Congratulations	353
Chapter 14	The Internet	355
	Voice and Video on the Internet	357
	Modems and Access Numbers	358
	Free ISP	359
	Services	360
	House-Wiring Intranet	363
	E-Mail	364
	J-Mail and Spamming	365
	Connections	366
	Distance Learning	367

	Your Own Web Page	370
	Web Hosting	371
	Sex on the Web	371
	The Future	372
	Emoticons and Acronyms	372
Chapter 15	Printers	373
	Printer Life Expectancy	374
	Inkjets	375
	Multifunction Laser Machines	380
	Wide-Format Printers	380
	Laser Printers	381
	Color Laser Printers	386
	Plotters	387

	Dot-Matrix Printers	388
	Installing a Printer or Plotter	392
	Printer Sharing	392
	Green Printers	395
	Progress	395
Chapter 16	Essential Software	397
	Off-the-Shelf and Ready-to-Use Software	398
	List Price vs. Discount Price	398
	Surplus Software	399
	Software Upgrades	399
	CD-ROM Discs and Multimedia	401
	Shareware and Public-Domain Software	402
	Try Before You Buy	402
	Software Catalogs	402
	Essential Software Needed	403
	Computer-Aided Design	414
	Miscellaneous Software Programs	415
	Software Training	419
	LapLink for Windows	420
	Summary	420
Chapter 17	How Your Computer Can Help You	421
	Resume	423
	Home Office	424
	Other Tools of the Trade	429
	Networks	432
	Desktop Publishing	435
	Presentations	436
	Digital Cameras	440
	For the Kids	442
	Summary	442
Chapter 18	Computer Sound of Music	443
	What Sound Board Should You Buy?	444
	Speakers	445
	Microphones	446
	Music	447
	Internet Telephone and Video	448

	Teleconferencing	449
	Sound, Microphones, and Speakers	450
	Digital Sampling	450
	Installing a Sound Board	453
	Musical Instrument Digital Interface (MIDI)	455
	Synthesizers	457
	Piano Keyboards	460
	Music Software and Hardware	461
	Catalogs	461
	Trade Shows	462
Chapter 19	Component Sources	463
	Computer Shows and Swap Meets	464
	Magazines and Mail-Order	466

Hardware $29.95 U.S.A.

"The neat thing about Pilgrim's books is that they are written for people who aren't engineers or tinkerers. Even if you're not very handy with tools ... he takes you through the process step by step." -- **PC World**

THE DO-IT-YOURSELF GUIDE TO BUILDING A STATE-OF-THE-ART COMPUTER

Do you want more computer than you can afford? A powerful machine that's bigger, better, faster? One with lots of bells and whistles? Here's a way to get it! With tools you already own (like a screwdriver) and no technical experience, you can easily build a leading-edge, high-performance, super fast machine such as a Pentium II and get all the computer you dream of. Think of the bragging rights you'll earn. You'll be able to say, "I built it myself!"

Anyone can do it. As best-selling author Aubrey Pilgrim--the "preeminent guru on the inner workings of computers" *(PC World)*--explains in this book, computers are composed of readily available, easily interchangable parts--and not very many of them. He'll show you how simple it is to replace those parts in an old computer or put together an entirely new one from components. (They're designed for easy assembly!) And he even tells you how to compare, shop for, and save money on parts--all in plain English!

Building your own computer is a learning experience. You'll gain valuable knowledge of how these essential appliances work. And even if you end up buying a preassembled unit, this book will prepare you for the inevitable upgrades you'll want when the next generation of computers appears, better, faster, and doing more--say, six months from now!

Compare and contrast the leading Chips, including: · Intel Pentium II · AMD K6 · Cyrix M2

IF IT GOES
IN THE BOX,
IT'S COVERED
IN THIS BOOK

- CPUs
- Motherboards
- Memory
- Floppy Drives
- Hard Drives
- Backup
- Monitors
- Input Devices
- Communications
- Older Computers
- The Internet
- Printers
- Essential Software
- Sound and Music
- Component Sources
- Troubleshooting
- And Why You Need a Computer!

A volume in the McGraw-Hill **Save a Bundle Series**
